EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garrett Donley on 06/17/04.

The application has been amended as follows:

- Cancelled claims 18-19, 31-32, 36-45, 48-49, and 53-55

The following is an examiner's statement of reasons for allowance:

- The primary reason for allowance for claims 1-10, 24-25, 27, 30, 35, 46, and 52 is the limitations of a multiple-lines inkjet printhead, each line head comprising a pressure chamber block including a common liquid chamber for storing ink, a plurality of pressure chambers communicating with the common liquid chamber, a plurality of actuator blocks each including a piezoelectric element, a first electrode and a second electrode for applying a voltage across the piezoelectric element, and a vibration plate, the actuator blocks being arranged on one surface of the pressure chamber block so that more than one of the pressure chambers of the pressure chamber block are covered by the vibration plate. It is these limitations, either single or in combination, that are not found, taught, or suggested by prior art.

- The primary reason for allowance for claims 11-17 and 47 is the limitations of an inkjet printhead comprising a pressure chamber block including a common liquid chamber for storing ink, a plurality of pressure chambers communicating with the common liquid chamber; the pressure chambers of the pressure chamber block form a plurality of pressure chamber rows arranged in a head longitudinal direction, each pressure chamber row including more than one of the pressure chambers that are arranged in a direction inclined from the head longitudinal direction, and each of the actuator block is formed in a parallelogram shape having a side that is parallel to a row direction of each pressure chamber row. It is these limitations, either single or in combination, that are not found, taught, or suggested by prior art.
- The primary reason for allowance for claims 20-23, 26, 28, 29, 33-34, 50, and 51 is the limitations of an inkjet printhead comprising a pressure chamber block including a common liquid chamber for storing ink, a plurality of pressure chambers communicating with the common liquid chamber; the pressure chambers of the pressure chamber block form a plurality of pressure chamber rows arranged in a head longitudinal direction and in a scanning direction, each pressure chamber row including more than one of the pressure chambers arranged in a direction that is inclined from the head longitudinal direction, and at least one pressure chamber of a pressure chamber row is located along a same line in the scanning direction with at

least one pressure chamber of another pressure chamber row, and nozzles that correspond to the pressure chambers located along the same line in the scanning direction are also located along a same line in the scanning direction. It is these limitations, either single or in combination, that are not found, taught, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

* Takeuchi et al. (5,617,127) teach an inkjet head comprising an actuator having a pressure chamber or chambers defined by an integral ceramic substrate.
